

Safe and secure with Schüco

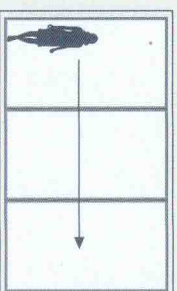

Improvements with the new door include a higher level of airtightness resulting in improved U values to create a warm, energy efficient home.

A more streamlined look with fewer hinges is combined with increased security. Tested to PAS24/RC2 burglar resistance, the new bi-fold door is also covered by Secured by Design, the official police security initiative.

Comparison

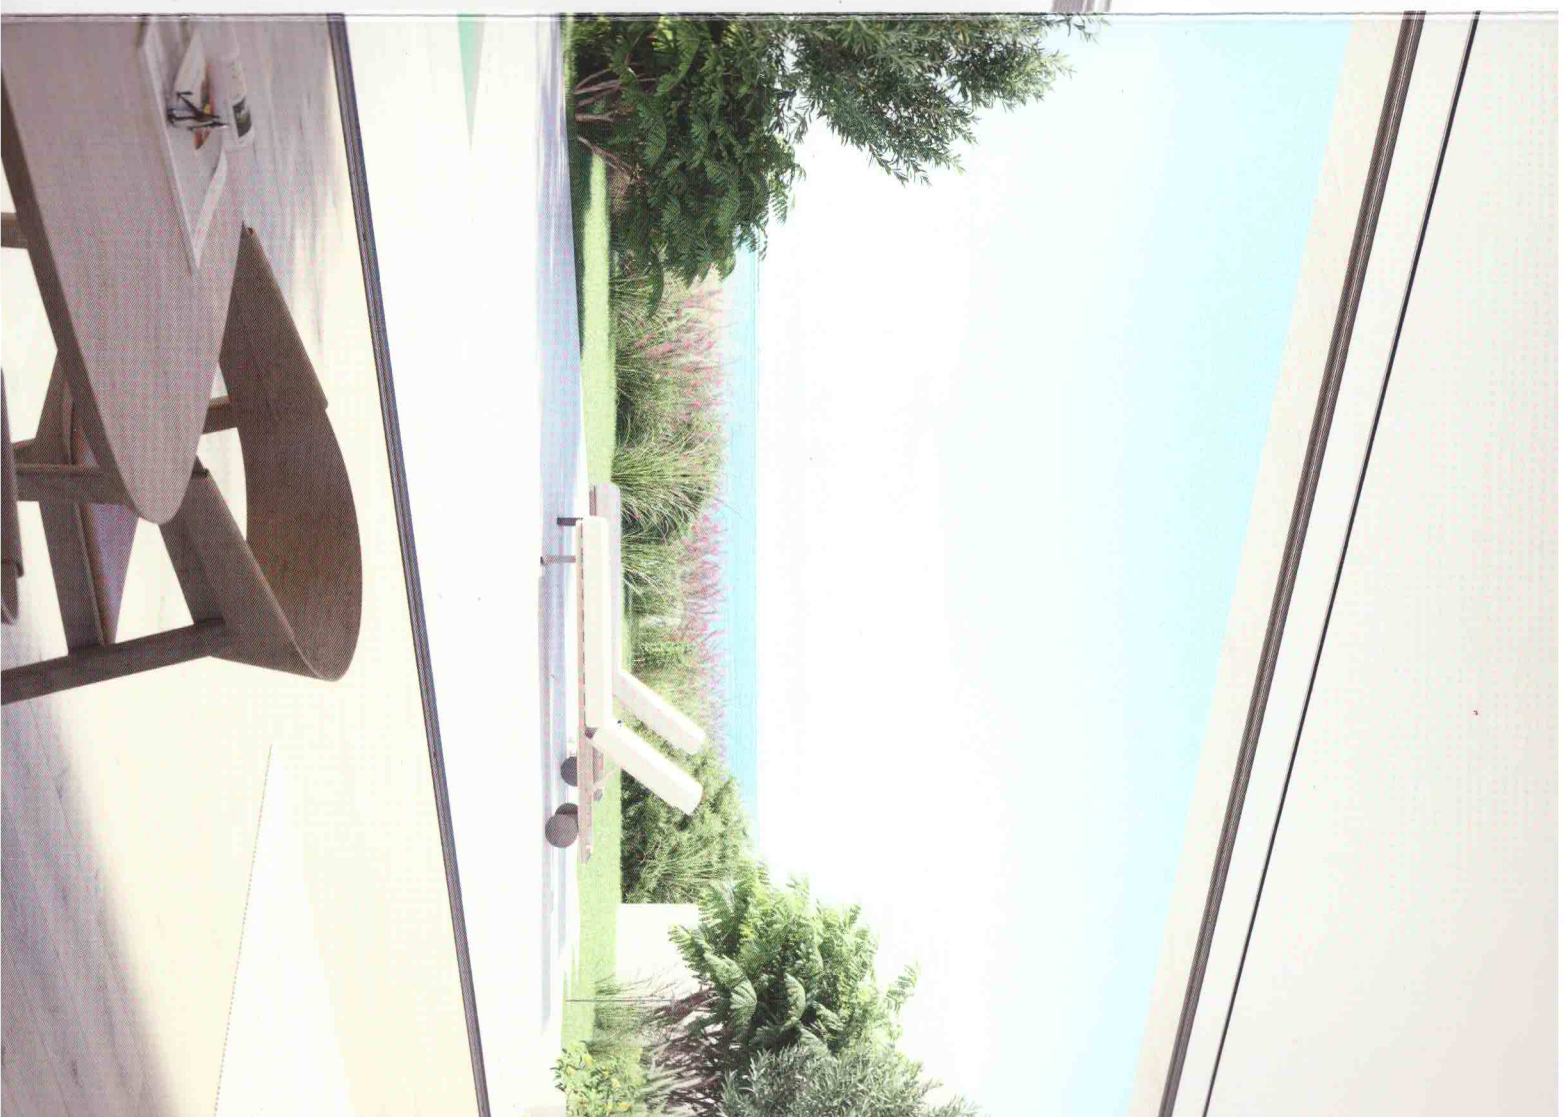

ASS 70 FD

AS FD 75 **NEW**

Pane width	1200mm maximum	1500mm maximum
Sightline	120mm	90mm
U value	1.6 W/(m ² K)	1.3 W/(m ² K)
Lock	3-point lock, key-operated	3-point lock, handle-operated option

When you don't want anything in between you and the outside

Make the most of your inside-outside space with this pioneering new glazing solution. Whether opened or closed, this large folding glass door with its slim frames creates a transparent connection between the inside and outside. Our expert designers have worked on improving the most successful of our products, building on already second-to-none engineering, to develop the ultimate bi-fold door.

Schüco AS FD Bi-Fold Door

Offering our slimmest sightlines yet of only 90mm, the new bi-fold door is available in significantly larger sizes than the previous model with pane sizes of up to 3.5m high x 1.5m wide. Maximum light with minimum frames.
